PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of experience building scalable web applications, enterprise-grade frontend architectures, and modern user interfaces using React.JS, Next.js, TypeScript, and JavaScript. Experienced working with distributed international teams across LATAM and North America in fully remote environments. Strong experience collaborating with cross-functional teams, mentoring developers, improving frontend reliability, and delivering measurable business impact through modern frontend engineering practices.

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer (React) — CI&T; (Remote) | Campinas, Brazil | Sep 2023 – Jan 2026

- Built scalable frontend solutions using React and TypeScript for one of the UK's largest gas and energy suppliers, helping reduce billing-related support tickets by 30%.
- Contributed to a large-scale microfrontend automotive platform using Next.js, TypeScript, and React Testing Library to support a strategic initiative targeting a 70% migration of non-registered users to mobile document access.
- Mentored junior developers through code reviews, pair programming, and recurring 1:1 sessions while collaborating directly with stakeholders and distributed teams.

Frontend Engineer > Senior Frontend Engineer (React) — GNAR | San Francisco, California (Remote) | Apr 2020 – Aug 2023

- Built frontend solutions for an SPA B2B platform focused on intermodal terminal services using ReactJS.
- Cooperated with backend engineers to introduce Redux Toolkit as a replacement for the legacy Redux implementation, making maintenance of back-to-front communication 50% easier.
- Led the implementation of styled-components across a non-opinionated styling codebase alongside the lead UI/UX designer, covering 80% of the entire application with the new technology.
- Collaborated with international remote teams in agile development environments.

Frontend & Mobile Engineer — Tagse | Santos, Brazil | May 2019 – Apr 2020

Enhanced frontend and mobile applications using React Native.

Frontend Engineer — YBOH | Santos, Brazil | Sep 2017 – Apr 2019

Improved and maintained frontend applications using AngularJS.

Founder & Fullstack Engineer — HRTBOX | Santos, Brazil | Aug 2015 – May 2018

Developed a fullstack product platform that was successfully acquired in 2018 by YBOH.
